Section 3: Biotechnology

About the journal

Agronomy and Biological Sciences Insights (ABSI) is an international peer-reviewed research journal, open-access, published by the Laboratory of Management, Conservation and Valorization of Agricultural and Natural Resources 'LMCVANR' (University of Khenchela - Algeria). It publishes original research, short communication, and reviews in all areas of agricultural and biological sciences, in addition to the proceedings of seminars. ABSI is devoted to publish manuscripts that advance the knowledge of agronomy, horticulture, forestry, genetics, biochemistry, microbiology, biotechnology and other fields of agronomic and biological sciences. Manuscripts submitted to the journal are subject to rigorous and unbiased peer review. The journal is published twice a year in June and December.

Policies

Aim & Scope

Agronomy and Biological Sciences Insights (ABSI) is striving to disseminate recent techniques and applications in agriculture and applied biology for researchers, students, and scholars in research institutes and universities worldwide.

The journal publishes manuscripts that report recent findings in the following areas:

- Agronomy & Horticulture
- Crop Protection
- Soil Fertility & Organic Farming
- Plant Biology
- Plant Biotechnology
- Agroforestry
- Biochemistry
- Microbiology
- Genetics
- Food sciences
- Other fields of agronomic and biological sciences

Open Access Policy

ABSI provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge. This journal does not charge APCs or submission charges.

Submission

Manuscripts to be considered for publication must be submitted by the authors through the following e-mail absijournal@univ-khenchela.dz

Similarities will be verified in the manuscripts through specific plagiarism verification tools, providing a report to support the decision regarding the originality of the text. Manuscripts with 20% or greater similarity will be automatically rejected.

The selected articles should have originality and scientific or technological innovation that fit the journal's publishing areas, providing increased visibility and recognition in the scientific environment.

Manuscripts pre-selected by the ABSI Scientific Editors are sent to at least two experts. Thus, these specialists are responsible for evaluating the quality and relevance of manuscripts submitted for publication.

When submitting an article, the authors assign the copyright and use of all its content to the ABSI, if it is approved for publication, but the opinions expressed in the texts are the sole responsibility of the authors.

When submitting the article, the corresponding author must send a cover letter to the editor, summarizing the findings of his manuscript, showing that it is in the interest of the ABSI to publish it, that it is original and has been not submitted or published previously elsewhere. Moreover, the cover letter should clearly mention the copyright transfer to ABSI and address that there are no conflicts of interest associated with the manuscript and meet all applicable standards regarding the ethics of experimentation and research, and there are no duplicate publications, fraud, plagiarism, or concerns about animal or human experimentation. The manuscript must be prepared in English.

IMPORTANT:

The manuscript must be submitted in accordance with the available template and within all ABSI submission policies. If the manuscript does not meet the submission criteria, it will be returned to the author for the necessary adjustments.
