

Ethic charter of the scientific publication in the Journal of Environmental Studies

The Journal of Environmental Studies, publishes articles that are original and subject to approval by reviewers committee, in order to promote scientific research in law and environmental sciences and present for publications the best articles, taking into consideration respect and obligation of the ethics publication in order to guaranty the protection of the rights of both and the journal.

Ethic of president of the editor:

Editorial committee consists on: chief editor, assistant editors, reviewers and secretariat:

- 1- The chief editor is considered, responsible for the decision to publish in the journal in accordance with legal criteria and conditions for publications.
- 2- Articles sent to the journal must be, before sending them to the reviewers to decide upon them, examined and controlled by the editorial board to make sure that they do not contain any defaming degrading expressions or in violation or the rights of publications and printings or outside the specialty of the law and political sciences.
- 3- the chief editor is charged to follow the valuations procedures of the article in a continued coordination with the reviewers, in case of unnecessary delay by the latte, the chief editor is authorized to discharge the reviewer from the mission attributed to him/her and designate another reviewer instead to finish the evaluation procedures before the acceptance of the article for publication.
- 4- Chief editor and assistant editors are charged to choose reviewers from the rank of professorship specialists in the field of legal and political sciences among national and international eminent lawyers.
- 5- Members of editorial board are required to keep secret all private information concerning authors of article.
- 6- Non-published articles are not subject to be used or benefited from without a declaration or written authorization from author.

Ethic concerning the reviewers:

The reviewer is a member of arbitration committee designed by the editorial board and who is registered in national platform of Algerian journals reviews and periodicals.

- 1- The reviewer charged to evaluate an article must not exceed the period of time indicated in the report of evaluation, in case of failure to evaluation on time, the reviewer is required to inform the chief editor of giving him objective excuses for that delay.
- 2- The reviewer is obliged to keep secret the subject of articles and not to discuss its content with any party even after the refusals and evaluation except for persons authorized by the chief editor.
- 3- The reviewer is obliged to be objective in evaluating the article concerned and not affected by any subjectivity, bias or prejudice.
- 4- The reviewer must observe originality of the article and make sure that there is no scientific copying.

i.e. plagiarism, and make sure as well that the references, are correctly placed in case of the contrary, the reviewer must inform the chief editor of the matter in order to dissolve himself from any liability or responsibility in trying to hid a scientific theft (plagiarize).

Ethic concerning the author:

The author is as every researcher sent his article to the journal for a possible publication, he can be either a university lecturer, or a member of a group in search centers or working with special interests to the fields of law and politics, weather he is a doctor or a post-graduate student preparing a doctorate degree.

- 1- The author must respect the formal conditions required for the publication of the article in the journal.
- 2- The submitted article must have the quality and originality required in clear and objective terms.
- 3- The author must be restricted to obey by the rules and procedures quotation and citations, in whole or in part, from other books, articles, academic periodicals, studies, reports or Web-Sites.

This means that he must use the notes and references in his article correctly, and indicate all the information and sources used in his work to avoid any legal proceedings for scientific theft (plagiarism).

The journal is entitled to use all kinds of software to detect any scientific wrong doing or act of piracy concerning texts presented for publication.

- 4- The author is not entitled more authorized to submit the same article to more than one journal.
- 5- In the case of discovering any fundamental error in the article by the author, he must inform the chief editor and cooperate with him to correct that error.
