Plagiarism Detection and Academic Integrity Policy

Mina Review for Economic Studies (MRES) is committed to the highest standards of academic integrity and research ethics. All manuscripts submitted for publication undergo rigorous screening using specialized plagiarism detection software prior to the commencement of the peer-review process.

Acceptable Similarity Thresholds:

- ❖ The journal does not accept any manuscript exceeding an overall similarity index of 20%.
- ❖ Any remaining similarity (within the 20% threshold) must be exclusively attributed to:
 - ❖ Properly cited reference material with clear source attribution
 - ❖ Standard economic and scientific terminology prevalent in the field
 - ❖ Fixed legal, formal, or methodological expressions
- ❖ Any uncredited similarity or substantive likeness in original analytical ideas and content constitutes plagiarism and is unacceptable.

Unacceptable Forms of Plagiarism:

- ❖ Direct copying from sources (print or electronic) without clear attribution
- ❖ Insufficient paraphrasing while retaining the essential structure and logical flow of the original text
- ❖ Appropriation of ideas, results, data, or analytical frameworks without crediting sources
- ❖ Self-plagiarism (republishing of one's own work or significant parts thereof without disclosure or prior permission)
- ❖ Translational plagiarism (copying works in another language and presenting them as original)
- ❖ Submission of previously published work (in whole or in part) without proper disclosure

Actions Taken:

- ❖ Manuscripts exceeding 20% similarity: Are automatically rejected without detailed notification. The author may resubmit the manuscript after addressing the causes of rejection, provided that the resubmission is treated as a new submission subject to all evaluation procedures from the beginning.
- ❖ Manuscripts with similarity between 15-20%: Undergo meticulous manual examination by the editorial board to determine the nature of the similarity. If the similarity results from properly cited references or fixed terminology, the manuscript may proceed to review. If it involves unacceptable plagiarism, the manuscript is rejected.
- ❖ Confirmed plagiarism cases after publication: Result in formal retraction of the published work, publication of a retraction notice on the journal's website, and notification of the author's affiliated institution.

Important Notes:

- ❖ The rejection decision due to violation of the plagiarism policy is final with no appeal process.
- ❖ The author retains the right to resubmit after comprehensive correction of similarity issues, but the manuscript will be processed as a new submission with all applicable procedures.
- ❖ The journal bears no responsibility for delays or rejection resulting from the author's non-compliance with this policy.
- ❖ This policy is an integral part of the publication terms of Mina Review for Economic Studies and is strictly enforced to ensure the quality of scientific content and the originality of research contributions in the field of economic studies.
