Editorial

The Recueil de Mécanique (RDM) is an international, peer-reviewed journal. It is edited by El-Wancharissi University of Tissemsilt. Manuscripts written in English or French are accepted for review.

The journal covers a wide range of thematic areas. For illustration, but not limited to, the following topics are addressed:

- power plants (conventional and hybrid, stationary and on board);
- thermal science;
- thermodynamics;
- fluid mechanics;
- mathematical modeling of systems and processes;
- renewable energy (solar, wind, geothermal, tidal powered, etc ...) processes and technologies;
- mechanical contacts and tribology;
- machines dynamics, vibration, acoustic and maintenance;
- engineering;
- aerospace engineering;
- automotive engineering;
- computational mechanics;
- industrial and manufacturing engineering;
- mechanical engineering;
- ...etc.

In addition to original articles, the journal is also dedicating special issues to seminars and colloquium works. Since the vol.3 n°1 the journal operates a double blind review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent by the editor or the associated editors to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles.

RDM is an open access journal which means that all content is freely available without charge. Users are allowed to read, download, copy, distribute, print, search, or link to the full texts of the articles in this journal without asking prior permission from the publisher or the author. RDM is indexed in Sherpa/Romeo, ULRICHS and Copernicus databases.

Guide for authors

Authors submitting a manuscript for review must ensure that it has not been previously published or simultaneously submitted to multiple journals. When using a figure, photograph, or table from another publication, they must indicate the source and obtain reproduction rights from the relevant publisher.

All manuscripts are examined by two reviewers. Only papers that have received a favourable opinion from the reviewers will be accepted for publication.

The manuscript should be formatted according the template. Paper submission is done exclusively via the National Algerian Scientific Journals platform ASJP.

Papers are published free of charge and without publication fees. They are available for download at El-Wancharissi University of Tissemsilt and at the ASJP.
