Dear reader,

The journal continues its eighth year of publication. This year, the journal was classified by the Ministry in category (B), as a result of the journal being indexed in the European Reference Index for the Humanities and Social Sciences Erih plus. This classification enhances the journal's visibility and readability within European and international research institutions, thereby opening new horizons for international researchers to contribute their research, reviving scientific debate and dialogue, and engaging readers with economic developments and current issues. The number of international authors in this issue exceeded twelve (12) nationalities. They wanted to share with us their ideas, recommendations and solutions by addressing current problems and issues in economics, management, finance, accounting and auditing, especially the connection of some articles to the environment , climate and IA.

Finally, we thank the editors, reviewers, and secretary for the successful publication of the current issue.
