Terms and conditions of publication:

Ibn Khaldûn Journal of Innovation and Development (IKJID) publishes scientific articles in the fields of economics, commerce, accounting, marketing, and management. Manuscripts may be submitted in Arabic, French, or English, provided that the following conditions are respected:

1. The submitted manuscript must be original and should not have been previously published or submitted for publication in any other journal, periodical, conference, forum, or symposium.
2. Authors must adhere to rigorous scientific analysis and comply with generally accepted academic and methodological standards.
3. The first page of the article must include the title of the manuscript in both Arabic and English, along with the author's full name, academic title, degree, institutional affiliation, e-mail address, and an abstract in two languages.
4. Each submission must include two abstracts: one in the language of the manuscript and the other in English. Each abstract must not exceed 100 words and should be accompanied by relevant keywords.
5. Citations must be provided in-text using parentheses, and the reference list must appear at the end of the article in accordance with the APA (American Psychological Association) citation style.
6. The article must be supported by original and credible sources, particularly for ideas, judgments, definitions, models, theories, findings of previous studies, data sources, and figures.
7. The manuscript must be prepared in Microsoft Word using Simplified Arabic font, size 13, with 1-line spacing. The page format should be A4 (29.7 x 21 cm), with mirrored margins (Mise en page → Marges → En Miroir).
8. The article must be between 12 and 25 pages in length, including figures, tables, and references. Pages must be numbered at the center of the footer.
9. The article must be free from punctuation, grammatical, and spelling errors.
10. All submitted manuscripts are subject to evaluation by the Journal's Scientific Committee. Authors will be notified electronically of the evaluation results through their account on the Algerian Scientific Journal Platform (ASJP). Authors must strictly comply with the author guidelines and instructions available on the journal's ASJP page: <https://www.asjp.cerist.dz/en/PresentationRevue/709>. Signed declarations must be sent by e-mail to: [elamine@univ-tiaret.dz](<mailto:elamine@univ-tiaret.dz>) for pledges and any further inquiries.
11. Manuscripts must be submitted « **exclusively** » through the journal's account on the ASJP platform.
12. The IKJID Committee bears no responsibility for any scientific misconduct or plagiarism. The views expressed in published articles are solely those of the authors and do not necessarily reflect the position of the journal's management or its publisher, represented by the Shallala Palace Annex at Ibn Khaldoun University of Tiaret.

The opening :

Within this issue, 05 articles were accepted as follow:

The first article entitled: **The importance of digital platforms to improve food security**, for the researcher Abderrahmane AYA, aims to clarify the role of digital platforms implemented by some regional and international organizations concerned with food security, focusing on the most popular, particularly FAO Digital Services Portfolio, IFC Global Food Security Platform, and the Farmerlien as an African platform. AYA said also that Digital platforms that are used by specialist institutions are important for fighting food insecurity, famine and poverty across the world, by improving agricultural, increasing food production, and the country's capacity for food storage. In addition, safe food is essential to human health and well-being. it also supports national economies, trade and tourism, stimulating sustainable development.

As for the second article which entitled: **The Impact of Climate Change on Sustainable Rural Development in Algeria** for the researcher Bouchenafa Redha, his article highlighted that the main challenges facing rural development include climate change, low rainfall, urban expansion encroaching on agricultural areas, and weak water resource management. To address these challenges, sustainable rural development approaches should be adopted by attracting modern agricultural technological innovations and enhancing water security through increased investment in desalination of saline water, while employing artificial intelligence in water resource management via data analytics to provide accurate information that supports strategic decision-making. Additionally, big data analysis and predictive modeling enable decision-makers to better allocate water resources and plan for future water needs, whether in renewable energy-powered desalination, agricultural irrigation systems, or overall water cycle management.

While the third article which entitled **Financial Technology in Algeria: Balancing Innovation and Oversight for Economic Stability – The Role of Regulatory Bodies** for the researcher **Lina Bougouffa**, she focuses on the development and regulation of financial technology (FinTech) in Algeria. It aims to examine the role of regulatory and supervisory bodies in ensuring a balance between innovation and oversight, with a particular focus on laws governing FinTech, including regulations related to cryptocurrencies and other digital financial services. The study employs a descriptive and analytical methodology to assess how these regulations influence the sector while promoting sustainable growth. The study finds that while Algeria has made significant strides in establishing regulatory frameworks, challenges persist in aligning innovation with effective oversight. The study recommends enhancing regulatory clarity, strengthening institutional coordination, and promoting stakeholder awareness to support the sustainable development of FinTech in Algeria.

The fourth article included a study entitled: **Driving Sustainable Performance: Implementing a Balanced Scorecard Approach for Integrating Sustainability into Performance Management** for the researcher RABIA Lamia; In this article the researcher

discusses the interconnectedness between economic, environmental, and social dimensions of sustainability and emphasizes the need for a holistic perspective in performance management. The proposed approach highlights the benefits of integrating sustainability, including improved stakeholder engagement, enhanced risk management, and the ability to measure and communicate sustainability impact. Case studies and practical examples demonstrate successful implementations and address potential challenges faced during the integration process. Ultimately, this article emphasizes the importance of driving sustainable performance as a means to create long-term value while maintaining financial viability.

The fifth article entitled: **أثر استخدام الطاقات البديلة على تفعيل النشاط الفلاحي بالمناطق السهبية والصحراوية** for the researcher **روتال أسماء**, her study aims to try to Know the uses and exploitation of solar energy in Algeria in the field of desert and steppe agriculture in the long term. Solar energy represents a practical and sustainable solution to many agricultural challenges in the steppe and desert regions of Algeria. While she touched on several topics in her study namely: solar energy as a sustainable source of energy in steppe and desert areas, the use of solar energy in modern irrigation systems, solar energy in agricultural cooling and storage, solar farms and greenhouses. Therefore, investing in solar energy projects is an essential step towards achieving sustainable and comprehensive agricultural development in Algeria.
