Journal of Science and Knowledge Horizons

A free peer-reviewed scientific journal published regularly every six months by the Department of Islamic Sciences, Laghouat, Algeria. It is concerned with publishing research and articles in the fields of human, social and intellectual sciences, and receives scientific research in the three .languages: English, Arabic, and French

It aims to: - Disseminate and encourage the production of researchers and scholars, including professors, researchers, and doctoral students, especially research related to the cultural and social environment. As well as promoting scientific research in the field of human, social and cultural studies and serving the scientific heritage, as well as encouraging intellectual studies and studies in the field of comparison to achieve human and social dialogue, as well as .encouraging research in other fields of science

The journal is committed to publishing original research that meets the required academic requirements, and rejects anything that violates the ethics of scientific research and scientific honesty

Opening Remarks by the Editor-in-Chief

Dear Readers, Researchers, and Distinguished Contributors,

It is with great pleasure that I welcome you to Volume 6, Issue 2 (June 2026) of our journal. This issue reflects our continued commitment to advancing scientific knowledge through the publication of high-quality, peer-reviewed research that addresses contemporary challenges and emerging opportunities across diverse academic disciplines.

The contributions featured in this issue highlight the growing influence of digital transformation and artificial intelligence on modern societies, institutions, and legal systems. Alongside these themes, the issue explores important questions related to governance, democracy, cultural heritage, communication, education, organizational development, environmental concerns, and social well-being. Together, these studies demonstrate the vital role of interdisciplinary scholarship in understanding complex global realities and proposing innovative solutions.

The diversity of perspectives represented by authors from different countries and academic backgrounds enriches this issue and reinforces the importance of international scientific collaboration. Their work contributes not only to the advancement of knowledge within specific fields but also to broader discussions concerning sustainable development, social responsibility, human values, and technological progress.

As Editor-in-Chief, I would like to express my sincere gratitude to our authors for entrusting us with their research, to our reviewers for their valuable expertise and dedication, and to the members of the Editorial Board whose efforts ensure the academic quality and integrity of the journal.

We hope that the articles presented in this issue will inspire further research, encourage constructive dialogue, and contribute meaningfully to both scholarly inquiry and societal development.

Thank you for your continued support and engagement.

Editor-in-Chief
Volume 6, Issue 2 – June 2026

Opening speech by

Editorial

It is our pleasure to present to our readers Volume 6, Issue 2 (June 2026), which brings together a diverse collection of scholarly contributions reflecting the richness of contemporary academic research and the growing interaction between technology, society, law, culture, and sustainable development.

The articles published in this issue address a wide range of topics, including artificial intelligence and its legal, educational, and managerial implications, digital sovereignty, cybersecurity, responsible communication, digital marketing, human resource management, participatory democracy, anti-corruption mechanisms, and the protection of rights and freedoms in the digital age. The issue also features studies in literature, language, cultural heritage, archaeology, urban design, psychology, education, and social sciences.

A prominent theme emerging from these contributions is the transformative impact of digitalization and artificial intelligence on institutions, governance, communication, learning, and social relations. At the same time, the authors emphasize the importance of preserving human values, cultural identity, ethical responsibility, and legal safeguards in an increasingly technology-driven world.

The diversity of perspectives represented in this issue demonstrates the growing importance of interdisciplinary research in addressing contemporary challenges and generating innovative solutions for sustainable development. It also reflects the valuable contributions of researchers from universities and research institutions across Algeria and abroad, fostering academic dialogue and international scientific cooperation.

The Editorial Board extends its sincere appreciation to all authors, reviewers, and contributors whose dedication and expertise have made this publication possible. We remain committed to promoting high-quality scientific research and providing a platform for the dissemination of knowledge that contributes to academic advancement and societal progress.
